THE BEST WAY TO ALKALISE

The health secret you've never heard about – because it's too simple!

Facts of Life in the 21st Century

- Pollution is acidic.
- Most food is acidic.
- Most bottled spring water is acidic.
- Rainwater collected in a plastic tank is acidic.
- Reverse Osmosis and distilled water is acidic.
- Even some council tap water is acidic.
- Stress is the biggest acid builder of them all!

Alkaline Neutralises Acid. It's a Scientific Fact!

One way to receive our essential alkalinity is by drinking IONISED ALKALINE WATER.

What's more, because humans have to drink water, you don't need to do anything else to support your ongoing alkalinity!

JUST DRINK ALKALINE WATER!

What are you? ACIDIC or ALKALINE?

The vast majority of adults are too acidic – and this increases as we age.

Acid waste accumulates in fatty tissues by oxidising our inner terrain every day with acidic foods, stress and pollution.

"If someone was to ask me what is the one thing I can do to have better health, the answer would be very simple; start drinking alkaline ionised water.

Even if you are eating acidic foods, the most important thing is to start putting in those electron rich fluids so that you neutralise the acids from the foods that you are eating and help to maintain that alkaline design."
