Use only as directed. If symptoms persist consult your healthcare professional.
Do not use in first trimester of pregnancy, with an AICD, Pacemaker or with existing DVT. Consult your doctor if you have a history of epilepsy.

Aching legs? Swollen feet?

DO SOMETHING ABOUT IT.

Do things like you used to.

If you are one of the thousands of people who suffer from poor circulation resulting in swollen ankles, cold feet or aching legs then The Circulation Booster® may be the health tool to get you back on your feet again.

WHY IS GOOD BLOOD CIRCULATION IMPORTANT?

Good health and an active lifestyle require good circulation. Waking up and feeling great in the morning without aches and pains is just one of the many benefits of good circulation as well as making everyday tasks less painful. One of the main reasons given for being inactive is sore feet and leg pain. Many people believe that pain is just a part of life and have learnt to deal with it.

With The Circulation Booster you may come to experience that pain is a thing of the past.

WHAT IS THE CIRCULATION BOOSTER?

The Circulation Booster is a medical device designed to help increase blood circulation in the lower limbs. By simply placing your feet on each of the foot pads, therapeutic electrical impulses stimulate the nerve endings on the soles of the feet and the muscles in the lower legs.

“I bought a Circulation Booster for my 90 year old father last Christmas and for the first time in years he was kicking the soccer ball with his great grandkids! I can't thank you enough”

K PATTON. QLD

WHAT ARE PEOPLE USING IT FOR?

The Circulation Booster is a versatile medical device that allows you to provide a therapy to all parts of the body. Below are just some of the benefits that The Circulation Booster may help with:

- Reduce swollen ankles and feet
- Relieve tired, aching legs and feet
- Ease arthritic, joint and muscle pain
- Aid recovery from muscular injury
- Aid relaxation and overall wellbeing

"I am an active person and enjoy dancing – I even tap dance, and it is such a relief to do this free of pain. It has certainly changed my lifestyle."

I EDRIDGE. QLD

HOW IS IT USED?

For just 30 minutes daily while watching TV, relaxing or working at your desk, The Circulation Booster can offer significant improvement to blood circulation. By using the convenient remote control you have full control of the intensity level and duration of your therapy. The Circulation Booster also allows you to target body pain using the versatile body pads.

Once you've finished, the slim line Circulation Booster simply slides away to be stored under your chair or lounge.

"I find that 30 minutes on the machine relaxes me and allows me to sleep pain free." K LECK. QLD

TARGET SPECIFIC AREAS

The body pads included allow you to target other areas to help ease pain and relax tense muscles. The body pads are especially effective for use on the back, knees, elbows and shoulders. You can also apply them to different acupressure points or use them to stimulate specific muscle groups.

“Recently I had a pain in my neck and shoulder. After suffering for a few days and sleepless nights I used the Circulation Booster a few times and the pain has gradually passed.”

E DRUMMOND. UK

“My husband uses the pads on his lower back and shoulders with great results. With many thanks for a great product.”

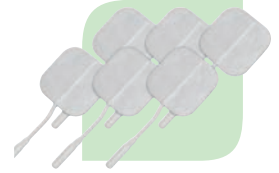

T JACOBS. VIC

ACCESSORIES

REPLACEMENT BODY PADS

To relieve body aches and muscle pain.

GLOVES

Gloves make a great extension to your treatment. Available in one size fits all, the gloves provide additional improvement to blood flow in the hands and forearms – allowing you to improve blood circulation through your hands and your lower legs simultaneously.
